GitHub | Content & AI Visuals Portfolio | Web Portfolio

PROFESSIONAL SUMMARY

Highly motivated Computer Science & Engineering student (CGPA 3.93/4.00) combining strong analytical and technical expertise with advanced AI tools to deliver high-impact digital content. Experienced in crafting SEO-optimized articles, engaging social media copy, and custom AI visuals alongside full-stack web and Android application development. Dedicated to producing well-researched, humanized content and functional software solutions.

EXPERIENCE

Freelance AI Content Creator & SEO Writer

Self-Employed / Remote

- Create search-engine-optimized (SEO) blog posts, articles, and website copy tailored to boost organic search visibility and reader engagement.
- Leverage AI workflows (ChatGPT, Claude, and AI image generators) with thorough human editing to produce natural, brand-aligned social media campaigns and custom visual assets.
- Translate complex technical and software topics into clear, accessible content for diverse digital audiences.

SKILLS & TECHNICAL STACK

Domain	Core Competencies & Tools
Content & SEO	SEO Blog Writing, Keyword Research, On-Page Optimization, Social Media Copywriting, Content Strategy, Humanized AI Editing
AI & Visual Tools	Prompt Engineering (ChatGPT, Claude, Gemini AI), AI Image Generation (Bing Image Creator), Visual Content Formatting
Programming & Web	Java, C++, JavaScript, Data Structures & Algorithms (DSA), HTML5, CSS3, Responsive UI Design
Mobile & Platforms	Android SDK, Android Studio, XML, Firebase (Firestore & Auth), Gemini AI API, Google Cloud Console, GitHub

SELECTED TECHNICAL PROJECTS

Project	Key Features & Implementation
AI Chatbot & Messenger	Built a smart assistant powered by Gemini AI API for natural language processing alongside a secure, real-time messaging app using Firebase.
Weather & Study Planner	Developed a real-time weather Android app with automated location-based theme switching and a productivity planner with local data persistence.
E-Commerce & OS Simulators	Designed a modern storefront with dynamic product filtering, plus an interactive Shape Detection game and Banker's Algorithm Deadlock Detective.
